Greenhouse Gas Accounting

October 15, 2009 | Orlando, FL | \$325

NEW: GBCI CE Hours: 8

CEUs: 0.8 | FBPE PDHs 0004040: 8.0

Solid Waste I II III: 8.0

Time: 8:00 am - 5:00 pm

When it is time to report your Emissions will you be ready..... (“EPA has proposed a rule that requires mandatory reporting of greenhouse gas (GHG) emissions from large sources in the United States.”)

Course Description

The course will focus on how to establish a GHG inventory and the rules, regulations and protocols surrounding them. The course will also offer an overview of the most accepted standards for GHG emissions reporting and the importance of third-party verification entities.

Course Objectives

By the end of the course learners will:

- Understand the fundamentals of greenhouse gas accounting and the various mechanisms of carbon markets
- Understand how to establish and assess an organization’s GHG profile and create a GHG inventory
- List and identify the protocols and regulations associated with GHG accounting
- Describe national and international GHG trends and define what the implications of these trends mean for the future with regards to government policy and business development
- Understand the built environment’s contribution to greenhouse gas emissions and the potential for reducing emissions in this sector

Course Instructor

Mark van Soestbergen, is President of International Carbon Bank and Exchange, in conjunction with CarbonSolutions, a consulting firm specializing in GHG accounting. Mark is a nationally recognized lecturer on climate change adaptation strategies, provides carbon footprint training for members of the American Council of Engineering Companies (ACEC) and recently served as a co-chair at EPA's 16th Annual International Emissions Inventory Conference.
