

Working Outside of the State of Florida

It is the responsibility of the persons who plan to do asbestos abatement work in other states to contact the particular state(s) to verify that accreditation, licensure, and other requirements are met.

"State accreditation programs may have more stringent requirements than does the EPA Model Accreditation Plan. As a result some EPA approved training courses may not meet the requirements of a particular State's Accreditation Program." -US--EPA

Our Asbestos Refreshers for Inspector, Management Planner, and Contractor Supervisor are currently approved by *Alabama Safe State*.
